

Product Information Sheet

Commission Delegated Regulation (EU) No 626/2011

Supplier name or trademark	PRIME3
Model identifier	SAC51
Model identifier(s) intended for indoor use	SAC51

Model identifier in the case of devices intended for outdoor installation

EPREL number:	2319421
Indoor sound power levels (cooling mode)	65 dB

Outdoor sound power levels (cooling mode)	-
---	----------

Refrigerant name	R290
GWP of the refrigerant	3

Refrigerant leaks contribute to climate change. If released into the atmosphere, a refrigerant with a lower Global Warming Potential (GWP) has less impact on global warming than one with a higher GWP. The device contains a refrigerant with a GWP of 3. This means that if 1 kg of this refrigerant is released into the atmosphere, its impact on global warming would be three times greater than the impact of 1 kg of CO₂ over a 100-year period. Never attempt to handle the refrigerant circuit or disassemble the device yourself – always seek assistance from a qualified specialist.

Cooling mode

Energy Efficiency Ratio (EER)	2.6
-------------------------------	------------

Energy efficiency class	A
-------------------------	----------

Hourly electricity consumption	Electricity consumption of 1.0 kWh per 60 minutes based on test results conducted under normal conditions. Actual electricity consumption depends on how the device is used and the location where it is installed.
--------------------------------	---

Cooling capacity	2.6 kW
------------------	---------------
